Garden Guide and Price List

GLADIOLUS

Plant when the trees native to your vicinity begin to unfold their leaves.

Plant in an exposed place where the sun has access. Well drained, light soil is best. Plant in rows 4 to 6 inches deep and keep ground loose and free from weeds. Dig bulbs when foliage is turning brown. Cut tops off close to bulb and dry bulbs for a few days in open place, be sure to keep from frost and severe freezing. Store bulbs in cold cellar or similar dry place where the temperature averages as near 40 degrees F. as possible.

Spray for Thrip Prevention.

1 teaspoon Paris Green.
1 pound Brown Sugar.
1 gallon Water.

Spray first when plants are 12 - 15 inches high and every week or 10 days till blooming season. Keep spray mixture well shaken when spraying as Paris Green will burn plants if applied too generously.

DISINFECTANT

1 oz. Bichloride of Mercury
8 gallons Water.

Soak bulbs overnight in above solution before planting. Use Earthen or wooden container in mixing above (use no metals). Throw away above mixture after using as same is deadly poison.

COLLINSVILLE, CONN.

March 15, 1939

From: Howard A. Hinman
Collinsville,
Connecticut

Dear Customer:

Owing to adverse weather conditions last summer, I missed a number of the regular visitors at the garden. Then, the florists whom I supply during the season made such heavy demands on my garden that I was short of blooms all season.

Our harvest of bulbs was exceptional. The bulbs here at Collinsville and those from my planting in West Avon were better than ever.

Now, I have all of them cleaned and graded, my summer orders all packed, and I still have plenty to supply my old customers. So if you are planning a garden it would be wise to make your selection now, send it to me and I will deliver in the usual way. Thanks for all past favors.

Sincerely,

Howard A. Hinman

Note: I now have a Greenhouse. Mrs. Hinman and my man make up floral designs and bouquets at all times. My prices are reasonable.
